

Hubert static coarse screen

- Robust filtration – A durable solution designed to withstand harsh conditions while effectively filtering water.
- High debris removal capacity – Ideal for eliminating large quantities of debris.
- Low maintenance – Requires minimal upkeep for reliable operation.
- Long service life – Engineered for an operating lifespan of approximately 35 years.

Hubert static bar screen

Design and construction

A coarse bar screen is exposed to significant forces and is therefore engineered specifically for your project application. Its design is simple, robust, and highly functional, ensuring optimal cleaning performance.

The Hubert static bar screen can be equipped with raking systems for efficient debris removal.

Additionally, multiple static bar screens can be used in combination with the Hubert trash rake gripper for enhanced cleaning capacity.

Dimensions and materials

Width	: up to 4 m
Pit depth (height)	: up to 15 m
Bar space	: 20-100 mm
Installation angle	: 70 - 90 degr.
Materials	: (coated) carbon steel, stainless steel, (super) Duplex
